Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Art Unit: 2166

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8, 10, 12 are rejected under 35 U.S.C. 102(b) as being anticipated by DXCG Document.

The reference entitled DXCG Document is four pages of screenshots obtained from DXCG.com. The document includes two sections. The first section is entitled “From Diagnosis Codes to Diagnostic Cost Groups” and “How DXCG Models Predict Resource use”.

These articles describe DXCG models used by DXCG, INC. According to the DXCG.com website, these models have been validated in published research dating back to 1986.

As seen on page 1 of the section entitled “From Diagnosis Codes to Diagnostic Cost Groups”, the DXCG model starts by obtaining a set of medical care codes, which are the ICD-9-CM medical codes which are well known in the art. These codes are then categorized into major disease categories called “DxGroups”. These major disease categories are then categorized into episode disease categories called “HCCs”. Within each HCC, the severity of a particular illness can be subcategorized. For example, metastatic cancer can be subcategorized as “Neoplasm 1”, while benign neoplasms can be subcategorized as “Neoplasm 8”.

There are 118 HCCs and each can be subcategorized by severity of illness, as seen by the neoplasms example above.

Art Unit: 2166

Some of the episode disease categories represent chronic conditions, such as cancer. These chronic conditions are subcategorized, as seen by the neoplasms example above.

The range of neoplasm severity from "Neoplasm 1" to "Neoplasm 8" represents a "leveling matrix" used to adjust the severity of illness for any given episode disease category.

A second set of medical care codes is applied when a subject has a second simultaneous illness. On page 1, the subject has four simultaneous illnesses, and thus four sets of medical codes. Each set of medical codes is further defined into major disease categories and episode disease categories, with each episode disease category having a leveling matrix for chronic conditions.

As seen on the fourth page of the DXCG document, the episode disease categories are aggregated to define a clinical cost for that particular subject. The cost defines a rating for that subject.

Also on page 4, last paragraph, it is seen that a subject is assigned to the most severe clinical risk group for each episode disease category. For example, a subject having both of illnesses defined by subcategories Neoplasm 1 and Neoplasm 2, the subject is assigned the subcategory of Neoplasm 1, which is the most severe category.

Claims 9 and 11 are allowed.

Remarks

Applicant's arguments regarding the rejection of claim 5 are well taken. The rejection has been withdrawn.

Applicant's arguments regarding the rejection of claims 1-8, 10 and 12 under 35 USC 102(b) have been considered but are not well taken.

Art Unit: 2166

Applicant argues that the DXCG document lacks any disclosure of a leveling matrix. As stated in the previous office action and repeated herein, the DXCG document does in fact disclose such a leveling matrix. An example of this matrix is the scale "neoplasm 1" through "neoplasm 8", which is used to adjust the severity of illness for any given episode disease category.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication should be directed to Sam Rimell at telephone number (703) 306-5626.
